JUDGING VIEW

Judges Review

Strong results that have made a meaningful impact on the business's success. Quantify this! Don't just give percentages, give numbers and revenue figures.

This will be one that I suspect is shared a lot – make sure you have clear and measurable objectives and refer to them in your results. This is the biggest thing that tanks many entries as people either aren't clear about what they hoped to achieve, or don't make it easy for us to see how they delivered on these goal.

The most important thing is to follow the entry form requirements. Some nominees leave some of the form's questions

unanswered, which affects the overall score of an entry. Judges are scoring each of your answers on the entry form, and if something is missing, then we're forced to give a lower score
